

COURSE SLIDES · WSQ

Building a Successful eCommerce Store with WooCommerce

WSQ Course Code: TGS-2026064474

Conducted by Tertiary Infotech Academy Pte Ltd · UEN 201200696W

Version v15.1 · 11 August 2026

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

COURSE ADMINISTRATION

Welcome & Housekeeping

Digital Attendance (Mandatory)

How Digital Attendance Works

1

Mandatory for WSQ funding

AM, PM and Assessment attendance must all be taken on the training day.

2

The QR code

The trainer or administrator displays the QR code generated from the SSG portal.

3

How to submit

Scan the QR code with your mobile phone camera and submit your attendance.

4

75% minimum

At least 75% attendance is required to be eligible for assessment and funding.

About the Trainer

Dr. Alfred Ang

Principal Trainer
Tertiary Infotech Academy Pte Ltd

ROLE

Principal Trainer, Tertiary Infotech Academy Pte Ltd

EXPERTISE

eCommerce, WordPress and WooCommerce content management systems.

DELIVERS

WSQ courses on eCommerce, web development, digital marketing and data analytics.

FOUNDER

Founder and lead instructor at Tertiary Infotech / Tertiary Courses.

Let's Know Each Other

1

Who you are

Your name, your organisation and the role you play there.

2

What you've used

Your experience with WordPress, eCommerce or running an online store.

3

What you'll sell

One product or business you would like to sell online by the end of today.

Ground Rules

1

Set your mobile phone to silent mode.

2

Participate actively — no question is too small.

3

Mutual respect: agree to disagree.

4

One conversation at a time.

5

Be punctual; return from breaks on time.

6

75% attendance is required.

Prerequisite

1

Basic WordPress

Basic WordPress operation is assumed in this course.

2

Comfortable with a browser

You can navigate a WordPress admin dashboard and upload an image.

3

A store to build

Bring a product idea — you will build a real catalogue around it today.

4

No coding required

Everything in this course is done through the WooCommerce interface.

Download Your Course Material

The screenshot shows a web browser window with the address bar displaying 'lms-tms.tertiaryinfotech.com'. The page has a blue header with 'Tertiary Infotech · LMS / TMS'. Below the header, there's a section titled 'MY COURSES'. Under this, a course card is visible for 'Building a Successful eCommerce Store with WooCommerce' with the ID 'TGS-2026064474'. Below the course card, there are three rows of downloadable materials, each with a 'PDF' icon, the material name, and a 'Download' button.

Material Type	Material Name	Action
PDF	Learner Slides	Download
PDF	Learner Guide	Download
PDF	Lesson Plan	Download

1

Keep them open in class

The assessment is open book.

Skills Framework — TSC

1

TSC Title

Content Management System Utilisation

2

TSC Code

RET-CIE-4002-1.1

3

Sector

Retail

4

Proficiency

Level 4 — Manage the utilisation of content management systems to create, curate and publish web content, measure performance and recommend improvements.

TSC Abilities — Assessed by the Practical Performance

1

A1

Monitor adherence to content management policies, guidelines and permissions on content management

2

A2

Develop and review metrics to measure performance of content management systems

3

A3

Recommend areas for improvements for a better customer experience in terms of organisation's web properties and assets

TSC Abilities — Assessed by the Practical Performance (cont.)

1

A4

Ensure smooth maintenance and consistent updates of content management systems

2

A5

Highlight and resolve issues related to content management systems

3

A6

Edit and curate web content

TSC Knowledge — Assessed by Oral Questioning

1

K1

Content management policies, guidelines and permissions on content management

2

K2

Web content for deployment

3

K3

Organisation's web properties and assets

4

K4

Creation and curation of web content guidelines

TSC Knowledge — Assessed by Oral Questioning (cont.)

1

K5

Web content and platform management systems

2

K6

Types of performance metrics of content management systems

3

K7

Criteria for evaluating metrics to measure performance of content management systems

Lesson Plan — Day 1

Morning · 9:30am – 12:30pm

- Digital Attendance (AM) · Introductions
- Learning outcomes, outline & TSC briefing
- Topic 1: Overview of WooCommerce CMS (LO1)
- Lab 1: Set Up Your WooCommerce Store
- Topic 2: Manage Products (LO2, LO3)
- Lab 2: Create and Curate a Simple Product
- Lunch Break — 1 hour

Afternoon · 1:30pm – 6:30pm

- Digital Attendance (PM)
- Lab 3: Variable Product · Lab 4: Curate Catalogue
- Topic 3: Payments & Shipping (LO4) · Lab 5
- Topic 4: Manage Sales (LO5) · Lab 6
- Topic 5: Manage Performance (LO6) · Lab 7
- Course Feedback & TRAQOM Survey
- Final Assessment — PP (75 min) + OQ (15 min)

Learning Outcomes

1

LO1 · Setup and monitor

Setup and monitor WooCommerce CMS to ensure adherence to guidelines and policies. (A1, K1)

2

LO2 · Edit and curate

Edit and curate product website on WooCommerce CMS. (A6, K2, K4)

3

LO3 · Maintain content

Maintain product web content on WooCommerce CMS. (A4, K2, K4)

4

LO4 · Payments & shipping

Recommend payment and shipping methods to improve customer experience. (A3, K3)

5

LO5 · Manage issues

Manage issues such as sales, out-of-stock and promotion. (A5, K5)

6

LO6 · Manage performance

Manage WooCommerce CMS performance. (A2, K6, K7)

Course Outline

1

Topic 1 — Overview of WooCommerce CMS

Setup, themes, widgets, shortcodes, settings, currency and tax.

2

Topic 2 — Manage Products

Product types, images, variations, categories, attributes, up-sells and CSV import.

3

Topic 3 — Payments & Shipping

Payment gateways, shipping zones, flat rate, free shipping and local pickup.

4

Topic 4 — Manage Sales

Orders, statuses, refunds, restocking, coupons and promotions.

5

Topic 5 — Manage Performance

Sales, customer and stock reports, dashboard widgets and Google Analytics.

Hands-On Labs on WooCommerce

Morning · Labs 1–2

- Set up your WooCommerce store
- Configure currency and tax
- Create your first product

Afternoon · Labs 3–5

- Build a variable product
- Curate the catalogue & CSV import
- Payments and shipping zones

Afternoon · Labs 6–7

- Orders, refunds and coupons
- Reports and dashboard widgets
- Google Analytics integration

Lab Environment — Demo WordPress Sites

1

Your demo site

Each learner is assigned ONE demo site by the trainer: wp1.tertiarytraining.com – wp5.tertiarytraining.com.

2

Log in

Open your site's /wp-admin page — Username: admin · Password: admin12345. For example <https://wp1.tertiarytraining.com/wp-admin>.

3

The demo store

All seven labs build Harbour & Co — a small Singapore apparel and accessories retailer going online. The Practical Performance uses the same retailer, so the labs rehearse the assessment.

4

Reset each class

The sites are wiped and re-imaged before every class — experiment freely; nothing you do can break anything that matters.

Briefing for Assessment

1

Place phones and other materials under the table or on the floor.

2

No photos or recording of assessment scripts.

3

No discussion during the assessment.

4

Use a black or blue pen for hard-copy assessments.

5

No liquid paper or correction tape.

6

Scripts are collected when the time is up.

Final Assessment

Practical Performance — 75 min

- Build and manage a WooCommerce store
- Assesses abilities A1–A6
- Open book, done individually

Oral Questioning — 15 min

- Open-ended questions, 1:1
- Assesses knowledge K1–K7
- Open book

What you may use

- The course slides
- Your Learner Guide
- Approved materials only
- An appeal process is available

Assessment Flow

Criteria for Funding

1

Attendance

Minimum attendance rate of 75% based on the SSG Digital Attendance record.

2

Assessment

Complete the assessment and be assessed as 'Competent'.

3

Digital attendance

AM, PM and Assessment attendance must all be taken.

4

TRAQOM survey

Complete the mandatory feedback survey on the LMS.

DAY 1

Building, Running and Measuring a WooCommerce Store

Topics 1–5 · Seven hands-on labs · Final assessment

TOPIC 1

Overview of WooCommerce CMS

What WooCommerce is · Setup wizard · Themes · Widgets & shortcodes · Settings, currency & tax

What is WooCommerce

WooCommerce is an open-source, fully customisable eCommerce platform built on WordPress.

Why WooCommerce

1

Open source

Free to use, fully customisable, and owned by you — not rented from a hosted platform.

2

Built on WordPress

Runs on the world's most widely used CMS, so your shop and your content live together.

3

Every product type

Physical, digital, virtual, variable, subscription and bookable products.

4

Endlessly extensible

Hundreds of themes, payment gateways and extensions, plus a full developer API.

Key Concepts in This Topic

1

What WooCommerce is

An open-source, fully customisable eCommerce platform built on WordPress, powering a large share of the world's online stores.

2

Six steps to a store

Choose hosting, install WordPress, pick a theme, activate WooCommerce, run the setup wizard, then extend with plugins.

3

System requirements

PHP 7.2+, MySQL 5.6+ or MariaDB 10.0+, a 128 MB WordPress memory limit, and HTTPS support.

4

Taxonomies and post types

WooCommerce adds its own post types and taxonomies to WordPress to group and structure products.

5

Themes and widgets

The theme sets the storefront's look; widgets surface products, filters and categories in widgetised areas.

6

Settings, currency and tax

General, Products, Tax, Shipping, Payments and Privacy settings define how the store behaves and prices goods.

WooCommerce Store Showcases

Trusted and used by amazing brands.

Learn more about some of the biggest brands and agencies using WooCommerce.

Real stores built on WooCommerce — <https://woocommerce.com/showcase/>

WooCommerce Demo Store

The Storefront demo — <https://themes.woocommerce.com/storefront/>

Start with WooCommerce in 6 Steps

System Requirements

1

PHP 7.2 or greater

The server-side language WordPress and WooCommerce run on.

2

MySQL 5.6+ / MariaDB 10.0+

The database that stores products, orders and customers.

3

Memory limit 128 MB+

WordPress needs headroom to process a catalogue and orders.

4

HTTPS support

Essential — you are handling payment and customer data.

Install WooCommerce

WooCommerce

WooCommerce is a powerful, extendable eCommerce plugin that helps you sell anything. Beautifully.

By *Automattic*

Install Now

[More Details](#)

Last Updated: 1 week ago

✓ **Compatible** with your version of WordPress

Plugins > Add New > search 'WooCommerce' by Automattic > Install Now > Activate.

The WooCommerce Setup Wizard

The screenshot shows the 'Store setup' step of the WooCommerce Setup Wizard. At the top, a progress bar indicates the current step is 'Store setup', followed by 'Payment', 'Shipping', 'Recommended', 'Activate', and 'Ready!'. The main content area contains the following fields and options:

- A heading: "The following wizard will help you configure your store and get you started quickly."
- A question: "Where is your store based?" with a dropdown menu showing "United States (US)".
- A label: "Address" with a text input field.
- A label: "Address line 2" with a text input field.
- Three input fields: "City", "State" (with a dropdown showing "Choose a state..."), and "Postcode / ZIP".
- A question: "What currency do you accept payments in?" with a dropdown menu showing "United States (US) dollar (\$ USD)".
- A question: "What type of products do you plan to sell?" with a dropdown menu showing "I plan to sell both physical and digital products".
- A checkbox: "I will also be selling products or services in person." (unchecked).
- A purple button at the bottom labeled "Let's go!".

On first activation the Setup Wizard configures the store for you.

Store Setup

The following wizard will help you configure your store and get you started quickly.

Where is your store based?

United States (US)

Address

Address line 2

City State Postcode / ZIP

Choose a state...

What currency do you accept payments in?

United States (US) dollar (\$ USD)

What type of products do you plan to sell?

I plan to sell both physical and digital products

☐ I will also be selling products or services in person.

Let's go!

Location and currency, the type of goods you sell, and whether you sell in person.

Taxonomies and Post Types

1

Post types

WordPress separates content into types — posts, pages, attachments. WooCommerce adds 'product'.

2

Taxonomies

A grouping of post types — categories and tags. WooCommerce adds product categories, tags and attributes.

3

Why it matters

This structure is what lets you filter, browse and curate a catalogue rather than a pile of pages.

4

Created for you

The setup wizard registers these automatically when WooCommerce is activated.

ThemeForest — <https://themeforest.net/category/wordpress/ecommerce/woocommerce>

Choosing the Right Theme

1

Aesthetic

Does it suit your brand and the products you sell?

2

Release frequency

An actively maintained theme keeps pace with WooCommerce updates.

3

Support

Is there documentation and a responsive support channel?

4

Custom functionality

What does it add beyond styling — and will that lock you in?

5

Responsive

It must work on a phone; most storefront traffic is mobile.

6

Compatibility

Confirm it declares WooCommerce support explicitly.

WooCommerce Widgets

1

Product widgets

Products, Products by Rating, Recent Product Reviews, Recently Viewed Products.

2

Filter widgets

Filter by Attribute, Filter by Price, Filter by Rating, plus Active Product Filters.

3

Navigation widgets

Product Categories as a list or dropdown, and a Product Tag Cloud.

4

Utility widgets

Cart and Product Search, so customers can buy and find from any page.

Adding a Widget

The screenshot shows the 'Appearance > Widgets' interface in WordPress. At the top, there is a search bar containing the text 'Products'. Below the search bar, a list of widget areas is displayed: 'Sidebar' (which is selected and highlighted in blue with a checkmark), 'Below Header', 'Footer Column 1', 'Footer Column 2', 'Footer Column 3', and 'Footer Column 4'. At the bottom of the interface, there are two buttons: 'Cancel' and 'Add Widget'.

Appearance > Widgets — choose a widget area, then Add Widget.

Renders the order tracking form.

WooCommerce Menu Items

Orders, Coupons, Reports and Settings — the four places you work every day.

Configuring WooCommerce Settings

1

General

Store address, selling and shipping locations, taxes and currency options.

2

Products

Shop pages, measurements, reviews, inventory and downloadable products.

3

Tax

Prices entered with tax, tax rates, and how tax is calculated and displayed.

4

Shipping

Shipping zones, methods, classes and shipping options.

5

Payments

Which gateways are enabled and the order they appear at checkout.

6

Accounts & Privacy

Guest checkout, account creation, and data retention policy.

Shop Currency

Currency Options

The following options affect how prices are displayed on the frontend.

Currency

Swedish krona (kr)

Currency Position

Right (99.99kr)

Thousand Separator

.

Decimal Separator

Number of Decimals

2

WooCommerce > Settings > General > Currency options.

Enabling Taxes

General options

Selling location(s)

Sell to all countries

Shipping location(s)

Ship to all countries you sell to

Default customer location

No location by default

Enable taxes

Enable tax rates and calculations

Rates will be configurable and taxes will be calculated during checkout.

Tick 'Enable taxes and tax calculations' — the Tax tab then appears.

Configuring Tax Options

The screenshot shows the 'Tax' settings page in WooCommerce. At the top, there are tabs for 'General', 'Products', 'Tax', 'Shipping', 'Payments', 'Accounts & Privacy', 'Emails', and 'Advanced'. Below the tabs, there are links for 'Tax options', 'Standard rates', 'Reduced Rate rates', and 'Zero Rate rates'. The 'Tax options' section is active and contains the following settings:

- Prices entered with tax:** Two radio buttons. The first is 'Yes, I will enter prices inclusive of tax' (unselected). The second is 'No, I will enter prices exclusive of tax' (selected).
- Calculate tax based on:** A dropdown menu with 'Customer billing address' selected.
- Shipping tax class:** A dropdown menu with 'Standard' selected.
- Rounding:** A checkbox labeled 'Round tax at subtotal level, instead of rounding per line' is unchecked.
- Additional tax classes:** A dropdown menu with 'Reduced Rate' and 'Zero Rate' selected.
- Display prices in the shop:** A dropdown menu with 'Excluding tax' selected.
- Display prices during cart and checkout:** A dropdown menu with 'Including tax' selected.
- Price display suffix:** A text input field containing 'N/A'.
- Display tax totals:** A dropdown menu with 'As a single total' selected.

At the bottom of the form is a blue button labeled 'Save changes'.

WooCommerce > Settings > Tax — visible only once taxes are enabled.

Prices Entered With Tax

1

Inclusive

'Yes, I will enter prices inclusive of tax' — catalogue prices already contain the base tax rate.

2

Exclusive

'No, I will enter prices exclusive of tax' — tax is added on top at checkout.

3

Inclusive formula

$\text{tax_amount} = \text{price} - (\text{price} / ((\text{tax_rate\%} / 100) + 1))$

4

Exclusive formula

$\text{tax_amount} = \text{price} \times (\text{tax_rate\%} / 100)$

Set Up Your WooCommerce Store

LAB 1

Set up and monitor a WooCommerce CMS so it adheres to store guidelines and policies (A1, K1).

Install the WooCommerce plugin on a WordPress site, work through the setup wizard to define the store's location, currency and industry, then apply the Storefront theme and confirm the shop, cart, checkout and My Account pages have been created. You finish by setting the currency and tax options that every price in the store will follow.

YOU'LL BUILD

A working WooCommerce store with its currency, tax and core pages configured

WHY THE BUSINESS CARES

The setup wizard is where store-wide policy is set. Currency, tax treatment and page structure decide how every product is priced and presented — getting them right first avoids re-pricing an entire catalogue later.

TOOLS Plugins > Add New · WooCommerce Setup Wizard · Appearance > Themes · WooCommerce > Settings

Discussion — Content Management Policies for Your Store

DISCUSSION · 15 MIN

In pairs, consider a store you would run. Decide what content management policies, guidelines and user permissions it needs, and how you would monitor that people actually follow them.

1

Who should be able to publish a product, and who should only be able to draft one?

2

Which WordPress/WooCommerce roles map to those responsibilities?

3

What product-content guidelines would you set — image size, description length, mandatory fields?

4

How would you detect that a policy is not being followed?

YOUR OUTPUT A short policy statement: the roles, the content guidelines, and how adherence is monitored.

TOPIC 2

Manage Products on WooCommerce Store

Product types · Images & galleries · Variations · Categories, tags & attributes · Up-sells · CSV import

Key Concepts in This Topic

1

Product types

Simple, Grouped, Virtual, Downloadable, External/Affiliate and Variable each model a different kind of offer.

2

The Product Data panel

General, Inventory, Shipping, Linked Products and Attributes — where the substance of a product is defined.

3

Images and galleries

A featured image plus a gallery, with catalogue visibility controlling where the product appears.

4

Categories, tags, attributes

Categories are hierarchical, tags are flat, and attributes drive filtering and product variations.

5

Up-sells and cross-sells

Up-sells appear on the product page; cross-sells appear in the cart; related products are automatic.

6

CSV import and export

Create or update hundreds of products in one pass, including variations, from a single CSV file.

Product Types

1

Simple

The majority of products — shipped, with no options. For example, a book.

2

Grouped

A collection of related simple products bought individually, e.g. a set of six glasses.

3

Virtual

Needs no shipping — a service. Disables all shipping fields and the cart calculator.

4

Downloadable

The customer receives a file after purchase — an album, PDF or photo.

5

External / Affiliate

Listed and described on your site, but sold elsewhere.

6

Variable

Variations with their own SKU, price and stock — e.g. a t-shirt in sizes and colours.

Adding a Simple Product

Products > Add New — a familiar WordPress editing interface.

Product Short Description

The excerpt beside the product image; the long description fills the Description tab.

Product Categories and Tags

The image shows a screenshot of the 'Product Categories' and 'Product Tags' metabox from a WordPress admin interface. The 'Product Categories' section is expanded, showing a list of categories: 'Accessories' (unchecked), 'Clothing' (checked), and 'T-Shirts' (checked). Below the list is a link to '+ Add New Product Category', a text input field, a dropdown menu for 'Parent Product Category', and an 'Add New Product Category' button. The 'Product Tags' section is also expanded, showing a text input field with an 'Add' button. Below the input field is the instruction 'Separate Product Tags with commas' and a tag 'Ninja' with a close icon. At the bottom is a link to 'Choose from the most used Product tags'.

A featured image plus a gallery — and catalogue visibility controls where it appears.

Catalog Visibility Options

1

Shop and search

Visible everywhere — shop pages, category pages and search results.

2

Shop only

Visible in shop and category pages, but not in search results.

3

Search only

Visible in search results, but not in the shop or category pages.

4

Hidden

Only reachable on its own product page — useful for unlisted or bundled items.

Create and Curate a Simple Product

LAB 2

Edit and curate product web content on the WooCommerce CMS (A6, K2, K4).

Build your first catalogue entry. You add a simple product with a title, long and short description, price and SKU, upload a featured image and a gallery, then file it under a category and tag so customers can find it. This is the core content-curation task the CMS exists to support.

YOU'LL BUILD

A published simple product, complete with images, price, SKU, category and tag

WHY THE BUSINESS CARES

Product content is the storefront's sales copy. Consistent titles, descriptions and imagery are exactly the content guidelines a CMS policy governs — and the reason curation matters.

TOOLS Products > Add New · Product Data panel · Product image & gallery · Categories · Tags

Adding a Grouped Product

The screenshot shows the 'Product Data' tab in the WooCommerce admin interface. The 'Product Data' dropdown menu is set to 'Grouped product'. On the left, there is a sidebar with four options: 'Inventory' (selected), 'Linked Products', 'Attributes', and 'Advanced'. The main content area shows the 'Stock status' dropdown menu set to 'In stock', with a help icon (question mark) to its right.

Select Grouped from the Product data dropdown — price fields disappear.

Populating a Grouped Product

Virtual products are intangible and are not shipped.

Tick Virtual to remove shipping; tick Downloadable to add a file path and download limit.

Creating a Variable Product

Create a Variable Product with Attributes and Variations

LAB 3

Maintain product web content that carries options, pricing and stock per variation (A4, K2, K4).

Most real products come in options. You define a custom attribute such as Size or Colour, generate the variations from it, then give each variation its own SKU, price, stock level and image — and verify the dropdowns work on the storefront.

YOU'LL BUILD

A published variable product whose variations each carry their own price, SKU and stock

WHY THE BUSINESS CARES

Variations keep one product page instead of five near-duplicates. That is cleaner content, better SEO, and far less maintenance when a price or description changes.

TOOLS Product data > Variable product · Attributes tab · Variations tab · Used for variations

Categories, Tags and Attributes

1

Product categories

Hierarchical — parents and subcategories, with a slug, description, display type and image.

2

Product tags

Flat, with no hierarchy. Use them for cross-cutting themes such as 'cat print' or 'summer'.

3

Product attributes

Per-product or global. Global attributes power layered navigation and variations.

4

The default category

Every product must have a category; unassigned products fall into 'Uncategorized'.

The Default Category

☐		Hoodies	A short category description	hoodies
☐		Accessories	A short category description for accessories.	accessories
☐		Tshirts Edit Quick Edit Delete View Make default	A short category description	tshirts
☒		Uncategorized	—	uncategorized
☐	Image	Name	Description	Slug

Up-Sells, Cross-Sells and Related Products

Up-sells

- Shown on the PRODUCT page
- Recommended INSTEAD of this item
- Typically higher value or quality
- You choose them

Cross-sells

- Shown in the CART
- Complementary to what's being bought
- e.g. a case with a laptop
- You choose them

Related products

- Shown on the PRODUCT page
- Chosen AUTOMATICALLY
- Shares categories or tags
- Influenced by how you categorise

Up-Sells on the Product Page

Up-sells display beneath the product description.

Cross-Sells in the Cart

Cross-sells are promoted on the cart page, based on what is already in it.

Related Products

Automatic — pulled from products sharing the same categories or tags.

Product CSV Importer and Exporter

1

Built in

Included since WooCommerce 3.1 — no plugin required.

2

Every product type

Supports simple, grouped, external and variable products, including variations.

3

For new stores

Export a template, fill it in, and launch a whole catalogue in one pass.

4

For existing stores

Update hundreds of products, run a sale, or sync multiple storefronts.

Importing Products

Upload CSV file

Column mapping

Import

Done!

Map CSV fields to products

Select fields from your CSV file to map against products fields, or to ignore during import.

Column name	Map to field
ID <i>Sample: 80</i>	ID
Type <i>Sample: variation</i>	Type
SKU <i>Sample: T-SHIRT-SHIP-YOUR-IDEA-BLACK</i>	SKU
Name <i>Sample: Ship Your Idea</i>	Name
Published <i>Sample: 1</i>	Published

Products > Import > choose your CSV > Continue > map columns > Run the importer.

Mapping CSV Columns

The screenshot shows the 'Import products from a CSV file' step in the WooCommerce CSV Import tool. At the top, a progress bar indicates four steps: 'Upload CSV file' (active), 'Column mapping', 'Import', and 'Done!'. The main heading is 'Import products from a CSV file', followed by a description: 'This tool allows you to import (or merge) product data to your store from a CSV file.' Below this, there are two main options for file selection. The first option is 'Choose a CSV file from your computer:', which includes a 'Choose File' button, the text 'No file chosen', and a note 'Maximum size: 1 GB'. The second option is 'or enter the path to a CSV file on your server:', which includes a text input field containing '/srv/www/wordpress-default/public_html/'. Below these options is a section for 'Update existing products' with a checkbox and the text 'If a product being imported matches an existing product ID or SKU, update the existing product data.' At the bottom, there is a 'CSV Delimiter' section with a dropdown menu showing a comma (','). A link 'Hide advanced options' is located at the bottom left, and a 'Continue' button is at the bottom right.

Upload CSV file Column mapping Import Done!

Import products from a CSV file

This tool allows you to import (or merge) product data to your store from a CSV file.

Choose a CSV file from your computer: Choose File No file chosen
Maximum size: 1 GB

Update existing products ☐ If a product being imported matches an existing product ID or SKU, update the existing product data.

or enter the path to a CSV file on your server:

The Shop Page

Display Products, Categories, or both — one choice gives the cleanest look.

WooCommerce Blocks

Product blocks for any post or page — by tag, category, attribute, best selling, on sale and more.

Curate the Catalogue — Linked Products and CSV Import

LAB 4

Ensure smooth maintenance and consistent bulk updates of the product catalogue (A4, K2, K4).

Grow and maintain the catalogue efficiently. You organise categories and global attributes, link products together as up-sells and cross-sells to raise order value, then import a batch of products from a CSV file and export the catalogue for bulk editing.

YOU'LL BUILD

A curated catalogue with categories, attributes, up-sells, cross-sells and CSV-imported products

WHY THE BUSINESS CARES

Editing products one at a time does not scale. Bulk import and export is how a real store launches a catalogue, runs a seasonal price change, or syncs with a supplier feed.

TOOLS Products > Categories · Products > Attributes · Linked Products tab · Product CSV Importer/Exporter

TOPIC 3

Manage Payments and Shipping

Online & offline payment methods · Gateways · Shipping zones · Flat rate, free shipping & local pickup

Key Concepts in This Topic

1

Payment methods

Online gateways such as Stripe and PayPal, plus offline options like bank transfer, cheque and cash on delivery.

2

Choosing a gateway

Location, fees, supported currencies and whether the customer stays on your site all shape the decision.

3

Shipping zones

A zone is a geographic region; each zone carries its own shipping methods and rates.

4

Flat rate shipping

A standard cost per order, per item or per shipping class, defined inside a shipping zone.

5

Free shipping

A powerful incentive — commonly gated behind a minimum order amount or a valid coupon.

6

Local pickup

Lets the customer collect the order themselves, with optional cost and tax status.

Online Payment Methods

Payment

WooCommerce can accept both online and offline payments. [Additional payment methods](#) can be installed later.

Accept debit and credit cards in 135+ currencies, methods such as Alipay, and one-touch checkout with Apple Pay. [Learn more.](#)

☐

Square

Securely accept credit and debit cards with one low rate, no surprise fees (custom rates available). Sell online and in store and track sales and inventory in one place. [Learn more about Square.](#)

☐

PayPal

Safe and secure payments using credit cards or your customer's PayPal account. [Learn more.](#)

☐

Offline Payments

Collect payments from customers offline.

Continue

Card and wallet gateways that take payment at checkout.

Choosing a Payment Gateway

1

Stripe

Supports 25+ countries and recurring payments; the customer stays on your site.

2

PayPal

Active in 200+ countries, with PayPal Credit available for US stores.

3

Square

Suits merchants who also sell in person, in a physical store.

4

eWAY

Takes card payments directly on your store without redirecting the customer.

5

Klarna

Buy-now-pay-later across Europe, the UK and the US.

6

Payfast

A popular South African gateway for card and EFT, with no monthly cost.

Offline Payment Methods

Offline Payments	Collect payments from customers offline.	^
Check payments	A simple offline gateway that lets you accept a check as method of payment.	☒
Bank transfer (BACS) payments	A simple offline gateway that lets you accept BACS payment.	☐
Cash on delivery	A simple offline gateway that lets you accept cash on delivery.	☐

Continue

Direct bank transfer, cheque and cash on delivery — the order is held until you confirm payment.

Additional Payment Gateways

The screenshot displays the WooCommerce + Stripe website. The header features the 'WooCommerce + stripe' logo, a tagline 'The complete payments platform, engineered for growth.', and a list of features: 'Payments in 135+ currencies', 'Instant checkout', 'Fraud protection', and 'Customizable for developers'. A button 'Accept payments with Stripe' is also present. The main navigation bar includes 'WooCommerce', 'Features', 'Customers', 'Extensions Store', 'Theme Store', 'Support', 'Develop', and 'Blog'. A search bar and a shopping cart icon are on the right. The 'Payments' section is highlighted, with a sub-header 'All Extensions / Payments'. It includes a search bar and a list of 'Popular Topics' such as 'Stripe', 'PayPal', 'Square', 'Braintree', 'Authorize.net', and 'Amazon Pay'. A 'Filter by:' section on the left lists 'Payments', 'Fraud', 'In-Person Payments', 'Off-Site', and 'On-Site'. A featured extension for 'stripe' is shown, with a description 'Accept all major debit and credit cards as well as local payment methods with Stripe.' and a button 'FREE! VIEW EXTENSION'.

WooCommerce + stripe

Shipping

☐

Did you know you can print shipping labels at home?
Use WooCommerce Shipping (powered by WooCommerce Services & Jetpack) to save time at the post office by printing your shipping labels at home.

We'll use

Ounces

 for product weight and

Inches

 for product dimensions.

Continue

Set the unit of measurement for weight and dimensions before configuring rates.

How Shipping Is Structured

Core Shipping Options

1

Flat rate

A standard cost per order, per item or per shipping class.

2

Free shipping

Optionally gated behind a minimum order amount or a valid coupon.

3

Local pickup

The customer collects the order themselves, with optional cost.

4

Shipping classes

Group products that cost more to ship — bulky, fragile or heavy items.

Flat Rate Shipping

[Shipping Zones](#) > [Domestic](#) > Flat Rate

Lets you charge a fixed rate for shipping.

Method Title

Domestic Flat Rate

Tax Status

Taxable

Cost

5.00

Added to a shipping zone, with a title, tax status and cost applied to the cart.

Free Shipping

[Shipping Zones](#) > [Sweden](#) > Free Shipping

Free Shipping is a special method which can be triggered with coupons and minimum spends.

Title

Free Shipping

Free Shipping Requires...

Save changes

N/A

N/A

A valid free shipping coupon

A minimum order amount

A minimum order amount OR a coupon

A minimum order amount AND a coupon

'Free shipping requires...' — commonly a minimum order amount, to lift average order value.

Local Pickup

[Shipping Zones](#) > [Local](#) > Local Pickup

Allow customers to pick up orders themselves. By default, when using local pickup store base taxes will apply regardless of customer address.

Title

Tax Status

Taxable

Cost

Save changes

Let customers collect the order — some stores retitle this 'Collect in store'.

Configure Payment Methods and Shipping Zones

LAB 5

Recommend and configure payment and shipping methods that improve customer experience (A3, K3).

Make the store able to take money and deliver goods. You enable offline and online payment methods, then build a shipping zone for your country and add flat rate, free shipping and local pickup to it — finishing with a test checkout that proves the whole path works.

YOU'LL BUILD

A store that accepts payment and offers three shipping options, verified by a test checkout

WHY THE BUSINESS CARES

Payment and shipping are where carts are abandoned. Every method you offer, and every rate you set, is a direct customer-experience decision with a measurable effect on conversion.

TOOLS WooCommerce > Settings > Payments · Settings > Shipping · Shipping zones · Shipping classes

Discussion — Recommend Payment and Shipping for Customer Experience

DISCUSSION · 15 MIN

Working from the store you have built, recommend the payment and shipping mix that would give your customers the best experience — and justify the trade-offs.

1

Which payment methods do your customers expect, and what does each one cost you?

2

Does the customer stay on your site, or get redirected? Why does that matter for conversion?

3

Would free shipping above a threshold raise your average order value or erode your margin?

4

Which shipping zones do you actually serve, and what happens to orders outside them?

YOUR OUTPUT A recommended payment and shipping configuration with the customer-experience reason for each choice.

TOPIC 4

Manage Sales on WooCommerce Store

Orders & order statuses · Editing single orders · Refunds & restocking · Coupons and promotions

Key Concepts in This Topic

1

Orders and statuses

Pending, Processing, Completed, On-Hold, Cancelled, Refunded and Failed track an order's life.

2

Managing orders

View, filter and edit orders; change status, edit line items, add fees and apply coupons.

3

Adding orders manually

Phone and offline sales can be entered by hand and emailed to the customer for payment.

4

Refunds

Refund manually or through the gateway, with the option to restock the returned items.

5

Stock issues

Stock management, low-stock thresholds and out-of-stock handling prevent overselling.

6

Coupons and promotions

Percentage, fixed cart and fixed product discounts, with usage limits and expiry dates.

Managing Orders

An order is created at checkout, gets a unique ID, and carries a status through its life.

Order Statuses

1

Pending payment

Order received, no payment initiated — unpaid.

2

Processing

Payment received and stock reduced; awaiting fulfilment.

3

Completed

Order fulfilled — no further action required.

4

On hold

Stock is reduced, but you must confirm payment yourself.

5

Cancelled

Cancelled by admin or customer — stock is increased back.

6

Refunded / Failed

Refunded by an admin, or payment declined or requiring authentication.

Modify the status, the customer note, and which user the order is assigned to.

Editing a Single Order

1

Change status

Move the order through its lifecycle and trigger the customer emails.

2

Edit order items

Modify products, quantities, prices and taxes on an unpaid order.

3

Stock

Reduce or restore stock for the order directly from Order actions.

4

Apply coupons

Enter a known coupon code — the order must be unpaid for it to take effect.

5

Add a fee

Enter an amount or a percentage; negative fees apportion tax across items.

6

Order actions

Email order details to the customer, or regenerate download permissions.

Adding an Order Manually

WooCommerce > Orders > Add order — for phone and offline sales.

Refunding an Order

Order Items

☐ Item	Qty	Total

Check this box if the coupon grants free shipping. A [free shipping method](#) must be enabled in your shipping zone and be set to require "a valid free shipping coupon" (see the "Free Shipping Requires" setting).

Discount type and amount, free shipping, and an expiry date.

The Three Discount Types

1

Percentage discount

A share off the qualifying items. 3 shirts at \$20 = \$60; 10% off gives \$6.

2

Fixed cart discount

A flat sum off the whole cart. 3 shirts at \$20 = \$60; \$10 off gives \$50.

3

Fixed product discount

A set amount off EACH qualifying item. 3 shirts, \$10 off each, gives \$30.

4

Restrictions & limits

Minimum spend, product and category limits, usage limit per coupon and per user.

Process Orders, Refunds and Coupons

LAB 6

Highlight and resolve issues related to sales, stock, refunds and promotions (A5, K5).

Run the store as a shop manager. You walk an order through its statuses, edit and manually create orders, issue a refund that restocks the item, then build a coupon and prove it applies at checkout — the day-to-day issue resolution the CMS is used for.

YOU'LL BUILD

A processed order, a completed refund with restocking, and a working discount coupon

WHY THE BUSINESS CARES

Orders, refunds and promotions are where customer problems surface. Resolving them quickly and correctly — with stock and revenue staying accurate — is the operational heart of the store.

TOOLS WooCommerce > Orders · Order statuses · Refund · WooCommerce > Coupons · Checkout

TOPIC 5

Manage WooCommerce Performance

Sales reports · Customer & stock reports · Dashboard widgets · eCommerce metrics · Google Analytics

Key Concepts in This Topic

1

WooCommerce Reports

Orders, Customers, Stock and Taxes — the built-in view of how the store is performing.

2

Sales reports

Gross and net sales by date, product and category, plus top sellers, top earners and coupon usage.

3

Customer and stock reports

Customers versus guests, and low-stock, out-of-stock and on-backorder items.

4

Dashboard widgets

At-a-glance store status on the WordPress dashboard, configurable through Screen Options.

5

eCommerce metrics

Conversion rate, traffic, revenue by source, retention, repeat purchase and refund rate.

6

Google Analytics

Integrating analytics attributes revenue to channels and shows where customers drop off.

WooCommerce Reports

WooCommerce > Reports — Orders, Customers, Stock and Taxes.

Order Reports

Sales by date, by product, by category, coupons by date and customer downloads.

Customer Reports

Customers vs. Guests, and the customer list — sortable across time periods.

Stock Reports

OrdersCustomersStockTaxes

Low in stock | Out of stock | Most stocked

Product	Parent	Units in stock	Stock status	Actions
Woo Logo Shirt	-	5	In stock	 
Product	Parent	Units in stock	Stock status	Actions

1 item

Low in stock, out of stock, and most stocked — lost revenue you can prevent.

Dashboard Widgets

WooCommerce adds status widgets to the WordPress dashboard; tune them via Screen Options.

Metrics for a Successful Store

1

Sales & revenue

Gross and net sales, revenue by traffic source, and average order value.

2

Conversion

Sales conversion rate — the share of visitors who actually buy.

3

Traffic

Website traffic and organic acquisition traffic.

4

Engagement

Email click-through rate, email subscription rate and social media engagement.

5

Loyalty

Customer retention rate and repeat customer rate.

6

Problems

Refund and return rate, and customer enquiries.

Criteria for Evaluating a Metric

1

Actionable

Does a change in this number tell somebody to do something differently?

2

Comparable

Can you track it consistently over time and against a target?

3

Attributable

Can you tell which channel, campaign or product caused the movement?

4

Owned

Is there a person responsible for it, and a threshold that triggers a response?

Measure Store Performance with Reports and Analytics

LAB 7

Develop and review metrics to measure the performance of the store (A2, K6, K7).

Turn the store's activity into evidence. You read the Orders, Customers, Stock and Taxes reports, arrange the dashboard widgets a manager would want, install the Google Analytics integration, and select the handful of metrics you would actually use to judge whether the store is succeeding.

YOU'LL BUILD

A reviewed set of store reports, a configured dashboard, and a defined list of performance metrics

WHY THE BUSINESS CARES

Metrics are only useful if they change a decision. Choosing which few to track — and knowing what each one would tell you — is what separates a measured store from a busy one.

TOOLS WooCommerce > Reports · Analytics · Dashboard widgets · Screen Options · Google Analytics plugin

Discussion — Metrics to Measure Store Performance

DISCUSSION · 15 MIN

Decide which metrics you would use to judge whether the store is succeeding, and what criteria make a metric worth tracking at all.

1

Which three metrics would you put in front of the business owner every week?

2

What makes a metric useful — is it actionable, comparable, and tied to a decision?

3

What does a rising refund rate or a falling repeat-customer rate actually tell you?

4

Which report or tool produces each metric — WooCommerce Reports or Google Analytics?

YOUR OUTPUT A shortlist of performance metrics with the criteria used to select them and their data source.

WRAP-UP

Course Summary & Next Steps

What You Achieved

1

LO1 · Setup and monitor

Installed WooCommerce, applied a theme, and set currency, tax and permissions.

2

LO2 · Edit and curate

Created products with descriptions, images, galleries, categories and tags.

3

LO3 · Maintain content

Built variable products and bulk-updated the catalogue by CSV.

4

LO4 · Payments & shipping

Configured gateways and a shipping zone with three delivery options.

5

LO5 · Manage issues

Processed orders, issued a refund with restocking, and ran a coupon promotion.

6

LO6 · Manage performance

Read the sales, customer and stock reports and defined a metric set.

Your Next Steps

1

Keep building your store

Your WooCommerce site and catalogue stay yours after the course.

2

Launch with a real product

Pick one product, price it properly, and take a real order.

3

Revisit the Learner Guide

Every lab's step-by-step instructions are there for you to repeat.

4

Explore the documentation

Official guides at
<https://woocommerce.com/documentation/>

Recommended Courses

1

Search Engine Optimization (SEO)

Enhance brand awareness and drive organic traffic to your new store.

2

Email Campaigns with Mailchimp

Turn your customer list into repeat revenue with high-converting campaigns.

3

Professional Websites with WordPress

Deepen the CMS skills underneath WooCommerce.

4

SEO for Small and Medium Enterprises

Practical search optimisation scoped to an SME budget.

5

Business Innovation with Blockchain

Explore emerging technology for commerce and payments.

6

Full catalogue

Browse everything at www.tertiarycourses.com.sg

Summary & Q&A

1

The platform

WooCommerce turns WordPress into a complete, fully customisable online store.

2

The content

Products, categories, attributes and variations are what you curate and maintain.

3

The commerce

Payments and shipping are customer-experience decisions that shape conversion.

4

The operations

Orders, refunds and coupons are the day-to-day issues a store manager resolves.

5

The evidence

Reports and analytics tell you whether any of it is actually working.

6

Over to you
